

SUNNY PREP. & HIGH SCHOOL

(KHAITAN EDUCATION CENTRE)

Self Evaluation of our effort

FOLLOWING NEP GUIDELINES- ACCESS,EQUITY,QUALITY,AFFORDIBILITY, ACCOUNTABILITY

- ▶ Access -Parent Orientation Program is in regular basis to ease the virtual classroom difficulties and handling the portal(Our school is a paper free zone)
- ▶ Equity -Every Friday PTM is to make the parents feel free to share their concerns and give us a chance to cater the child .Aim is not to keeping any child uncared. Sharing the teacher's observation in regular basis to the parents. Special classes for slow learner as well as physically disabled child.
- ▶ Quality- Activity ,project based teaching to make the child confident in applying their learning.
- ▶ Accountability - Adoption Policy of Board appearing students by the teachers & Mom's Classroom Program. Planned exercises for physical and mental development. Get the parents connected with UMEED a child counselling unit.

LEARNING IS IN FOCUS

Lesson delivery by the help of student engaging activities

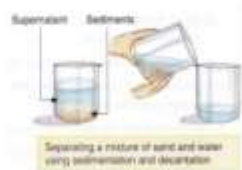

**Evaluate through different activities along with the traditional method.E.g –
Math Quiz, Math and Language Activity**

**Provide the platform to implement the knowledge ,learn and unlearn-
Science Fair, Walkathon,Poem Come Alive,Go Green Activity**

SCIENCE LAB

Class
3

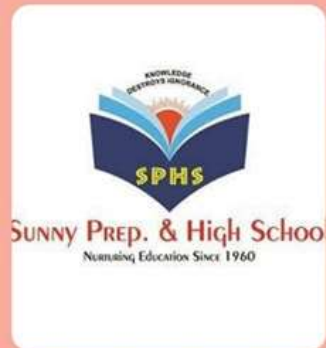

Class
1

MATHS LAB

ENGLISH LAB

AWARNESS DRIVE

DENGUE BEGINS ABRUPTLY AFTER A TYPICAL INCUBATION PERIOD OF 5-7 DAYS AND THE COURSE FOLLOWS 3 PHASES FEBRILE, CRITICAL AND CONVALESCENT.

Febrile Stage

Critical Stage

Recovery Stage

HOW THE DENGUE TAKES PLACE (THE PROCESS)

A mosquito bites a person infected with dengue virus, the virus enters the mosquito. Then, when the infected mosquito bites another person, the virus enters that person's bloodstream and causes an infection.

PREVENTIVE MEASURES TO BE TAKEN

- Wear long-sleeved shirt, long pants and closed-toe shoes instead of sandals.
- Apply mosquito repellents whenever possible or wear mosquito patches.
- Use mosquito coils that carry the dengue viruses are most active from dawn to dusk; keep windows and doors closed during these hours.
- Keep your house clean and tidy.
- Do not leave stagnant water lying anywhere in or around the house. It's very dangerous as these mosquitoes lie on the stagnant water only, it doesn't matter if it is dirty or clean.

TIGER CONSERVATION DAY
